

ANDREW SMITHWICK

626-500-5168 | andy.smithwick@gmail.com | [linkedin.com/in/andy-smithwick](https://www.linkedin.com/in/andy-smithwick) | <https://github.com/WishingWell13>

EDUCATION

University of California San Diego, B.S. Computer Science, GPA: 3.95, Revelle Provost Honors
University of California San Diego, M.S. Computer Science (AI & ML Specialization), GPA: 4.00

Graduated 2025
Expected Graduation 06/2026

SKILLS AND TOOLS

Programming: Python, Pandas, Next.js, ReactJS, Typescript, Jest, HTML, CSS, Javascript, .NET, NHibernate, Unity, Java, C#, SQL
Software: Docker, Kubernetes, Github Actions, Github, Visual Studio Code, Asana, Microsoft Office (Excel), Zoom
Project Management: AGILE, Scrum, Sprint Creation, Retrospectives, Conflict Management, Problem Solving

INDUSTRY & RESEARCH EXPERIENCE

Edwards Lifesciences, Data Science and Natural Language Processing Intern June 2025 - Present

- Built automated redaction pipeline for clinical studies using LLMs, AWS Bedrock, Textract, boto3, and Fitz, enabling secure document processing at scale
- Engineered prompts to generate case-specific medical narratives, enhancing adjudication decisions and documentation efficiency
- Built Python Streamlit portal on Snowflake to collect clinician feedback, improving collaboration across 40-member safety team

Qualcomm Institute, Artificial Intelligence Intern January 2024 - June 2025

- Fine-tune a **Llama3** Large Language Model trained on historical figure's speeches using **LlamaFactory** for interactive VR lectures.
- Lead 6 person team & develop model slicing system & UI for voxel graphical representation of solar wind in Unreal Engine 5.
- Processed VDB voxel data to rescale color ranges with different datasets, allowing both density & velocity representations

Ujima Security and Privacy Research Group, Artificial Intelligence Intern September 2023 - August 2024

- Wrote **Python** scripts using **Pandas**, **Matplotlib**, and **Gensim (NLP)** for **IEEE published paper as first author** on online game safety
- Utilized Prompt Engineering with **GPT-3.5** to identify hate crimes in news articles and documented codebase for project handoff
- Wrote error analysis scripts for BeautifulSoup & Selenium **web scraping** analyzing US privacy education to address paper feedback

Cornerstone OnDemand, Full Stack Engineer Intern February 2023 — April 2023

- Created HTTP **REST** & **GraphQL** API endpoints with **C# .NET** using **NHibernate** ORM for SQL conversion for CRUD category operations
- Utilized **XUnit** for backend testing, Jira for AGILE, and **Domain Driven Design** to match technical logic with business requirements
- Developed deleting & editing category features using **React**, **Apollo**, **Typescript**, & **Styled Components** serving 6000+ orgs
- Fixed bugs in menu components in an internal shared component library to work with **React Testing Library** tools & wrote **Jest** tests

PROJECTS

Institute of Electrical and Electronics Engineers, Webmaster November 2024 - Present

- Reduced knowledge loss by self-hosting Headless-CMS using Coolify and Directus to build onboarding website with **AstroJs** frontend
- Funded \$500 to represent UCSD IEEE chapter at IEEE Rising Stars 2024 and attend leadership workshops

Association for Computing Machinery (ACM) @ UC San Diego, Frontend Developer October 2022 — June 2025

- Developed store item, admin, & landing pages with responsive image grids, using **nextJS**, **Typescript**, & **SCSS**, for 2000+ members
- Design custom NavBar components to fit website theming, eliminate dependency on Ant Design V3, allow dark mode customization, eliminate hydration and flickering issues, & reduce setup time for new users by 8%

DSA Interactive, Game Director & Product Manager | Andy's Donuts (Apple App Store), NOKO March 2020 — July 2022

- Automated graphics/audio syncing & added finite state machines, **Observer Pattern**, speeding iteration cycles from 3 to 1 days
- Led **AGILE** scrums & sprint board creation for development of mobile iOS game on Apple App Store using Unity C#

TEACHING AND LEADERSHIP

Computer Science and Engineering (CSE) Department, CSE Tutor April 2023 - Present

- Automated attendance grading to Gradescope using **Python**, **pandas** and **pdfmetrics**, cutting process time by 75%
- Taught students bash **shell scripts**, git, web servers, and JUnit to create autograders, resulting in 96% approval rate over 3 quarters
- Automated peer review distribution using **R** and created staff rubrics, speeding up process by 25%

UC San Diego Residence Life, Residential Assistant August 2023 - Present

- Selected as one of 15 selected from 1000+ to act as provide mediation in crisis & manage \$10,500 budget for 30+ events

PAPERS, AWARDS & HONORS

- 2024 **First author:** *Parent seeking Roblox Safety Help: Comparing Parental Roblox Concerns to Roblox offerings*, ISTAS '24
- 2023 UCSD CSE Alumni Board Scholarship (\$1000); CR Persky Memorial Scholarship (\$2692); Revelle Provost Honors
- 2022 Disney Scholars (\$5000/yr for 4 yrs); Kiwanis Children Fund (\$1250); MHS Alumni Association (\$3500);
- 2020-22 Congressional App Challenge Best App (2022) & Best Visuals (2021); Hackwise 1st in AR/VR & 2nd in Well Being (of 123)
